14 tems or high out-of-pocket costs for patients in this state based on criteria adopted by the  
15 board by rule, including but not limited to:

16 “(a) Whether the prescription drug has led to health inequities in communities of color;

17 “(b) The number of residents in this state prescribed the prescription drug;

18 “(c) The price for the prescription drug sold in this state;

19 “(d) The estimated average monetary price concession, discount or rebate the manufac-

22 under review;

23 “(e) The estimated total amount of the price concession, discount or rebate the man-

7 cost-effective. For any prescription drug that extends life, the board’s analysis of cost-  
8 effectiveness must weigh the value of the quality of life equally for all patients, regardless  
9 of the patients’ age or severity of illness or disability.

10 “(b) As used in this subsection:

26 and research related to the introductory price or price increase of a prescription drug, in-  
27 cluding life cycle management, net average price in this state, market competition and con-  
28 text, projected revenue and the estimated value or cost-effectiveness of the prescription
