

I have been an Oregon citizen since birth and have watched for over 50 years as our state has changed. Once we included a prized process called "Initiative and Referendum," something other states wished they had available to them. In the past two decades, I have seen this precious process whittled away by manipulation and chicanery on the part of Progressive activists in Salem and our press. I urge you to stop your work against the will of the majority of Oregonians by dropping this bill and refraining from such proposals in the future.
