

I am writing in strong support of HB 2560. Restrictions during 2020 and 2021 due to Covid-19 have made it necessary to have meetings accessible remotely and the technology has proved itself eminently. I support making it a requirement via HB2560 because the advent of this technology has made public participation in the governing process much more readily accessible to the public. I see this measure as an important way to broaden public participation at all levels of government.
