

Recommend extreme caution in all proposed efforts Purported to rectify or 'recompense' racial inequities. In my lifetime and in my circles, I do not have nor display nor feel any racial bias. I do have to admit to being fearful in the presence of some homeless people, but that's because one cannot know their mental state. "Bias" laws may only widen the racial and cultural divide. Do not make someone feel even less valuable by attitudes painting them as victims.
