

I Strongly urge this committee vote this bill down since it leaves no recourse for the citizen in a timely fashion. I have heard this bill fills a loop hole which doesn't exist. The reference to "Loop Hole" is a falsity of huge proportions for the laziness of those responsible for the background check. When can we citizens expect those in authority to perform their duties as assigned in a prompt manner. When that can be accomplished we might then consider this infringement on the firearms laws of the state in the constitution and the infringement of the second amendment of the US Constitution. The legislative body of this state is really good at passing more laws and spending more money but fail at working for the citizens. Thank you for your consideration.
