

I OPPOSE HB2543,

This is just another attempt to infringe on our constitutional right of self-preservation and the right to "Keep and bear arms". By their own admission, The Department of State Police are unable to fulfill their obligations of processing background checks as it stands now. This leads to delays or denials to law abiding citizens with clean records which I have seen happen first hand with friends and family. This is only getting worse with defunding OSP yet this bill wants to exacerbate this issue and removes any accountability while the citizens deal with the consequences.

Please do NOT move this bill forward.
