

If this passes and my Tennant decides not to pay rent I will have lost years of hard work into this property. My business is already hanging on by a thread due to covid measures and this could be devastating for my family. We don't need to punish people who have worked there whole lives to get ahead in life because someone else decides to take the easy road and not pay rent. If the people are out of work there has been unemployment plus for people making it unreasonable for them not to pay rent. I strongly oppose this measure.
