

I oppose this bill. My husband and I are small property owner's that are in no means wealthy this would put us in a greater financial burden if this bill is extended further. We understand that some people are in need of assistance and we are willing to work with those people. There needs to be some checks and balances for this. That fact that they can just not pay and say they are affected with absolutely no proof is not right. They should have to have prove financial hardship and then have the ability to work with the landlord and come up with a game plan for assistance and getting back on track. The fact that we are not allowed to ask questions and just accept this is not right, we too have bills to pay and are affected negatively by these current times.

Thank you,  
Jesse and Roxanna Howell
