Re: HB2510

This bill is yet another attempt by lawmakers to place oppressive controls on law abiding citizens in a vain attempt to appease outraged constituents. This bill will do nothing to prevent crimes or suicides. Anyone intent on harming themselves or others will find the means to do so. Any locking device will be defeated by a determined criminal. This bill would then serve to make me responsible for their criminal actions, even though I may have made every reasonable effort to secure my firearms. Legislators wake up! Law abiding gun owners make our free society safer! Stop trying to tie our hands behind our back!
