

Greetings I hope this finds you well,

I am a born and raised third generation Oregonian and I love and enjoy my state and country. Let us not ignore the love and rights to human life that has been passed on from our four fathers to us. Which demand preservation of American life and personal freedom. I call for governments and public offices and their services to foster respect for its people and to empower its people showing responsibility and accountability in preserving citizens' rights.

A little background, I am a stay at home Dad on a fixed income I have 6 children and work part time and am in school pursuing a bachelor's degree and have been battling health issues that have almost caused me to claim disability until my recent lifesaving surgery which I have been recovering from over the last 4 months.

December 2020 I got an email discount offering from Sportsman's warehouse for a shotgun. I saw the offer and the price and it had been exactly what I was looking for and at an affordable price for me. Exactly what I was looking for meaning that it was an all-round tool I could use for my hunting and food production aspirations. You see I wanted to jump into Turkey and upland game hunting for myself and family, and this shotgun is a means to make that happen. I made the order on December 10th I went to Sportsman's Warehouse to start the paperwork the following day. I knew that the current wait would probably be a week and it took about two weeks before I got the call from Sportsman's Warehouse that OSP said there was an issue with DMV and canceled the order. I had never heard about just canceling an order this was a new thing I had not seen before. I was now out 10 dollars on the background fee and with no information on details to the exact issue, I just got canceled. I had then proceeded to contact OPS and the Challenge line and Fix line and left multiple voicemails, the last call I made to them was on December 29th, to date OSP had still not returned my call. I could not go in person because the OPS station closed its doors for Covid19. Jan 24th 2021 Sportsman still had the order on hold I completed another background and paid the 10 dollars. February 17th 2021 the transaction was completed. All this hassle and it's using the current law. I have no faith that the state would ever actually return my calls or resolve the matter making more restrictions. Give me faith in my state oppose 2543.
