

I oppose SRJ 25.

Why would we change the voting age from 18 to 16? There is nothing in this bill that explains the reasoning behind this. If we lower the voting age now, in the future will we again lower it to 14? Just leave well-enough alone.

16 year old kids are just that, kids. Let them live out their final years of childhood without putting the weight of voting responsibility on their shoulders. The human brain isn't even fully developed until the mid-twenties; a 16 year old would most likely base their reasoning on emotions instead of facts and logic; they simply don't have the life experience or maturity to make such decisions.

I strongly oppose.
