

I oppose this bill because I purchased my home on the water with a dock to enjoy boating and water sports with my family. I believe this bill oversteps the need to regulate boating safety and environmental concerns at this time. In addition, it would be my opinion as Oregon continues to pull out of these difficult economic times that it would be premature to continue to reduce the amount of fee based income, and tax revenue that the State would lose based on this bill. I appreciate your time as public servants and hope that common sense will prevail. Respectfully your friend in boating. Nathan Hurst
