

Dear Chair Marsh, Vice-Chairs Helm and Smith, and Members of the House Committee on Energy and the Environment,

Now is the time to move forward long-needed reforms to our statewide land use planning goals. If our state is to adequately confront the 21st Century challenges presented by the climate crisis and systemic environmental racism, then we need a 21st Century planning system that is up to the task. For that reason, I urge you to support HB 2488—Equity and Climate in Land Use, to ensure that Oregon’s land use planning system includes a comprehensive and rounded approach to addressing climate change mitigation and adaptation, equity, hazard risk reduction and environmental justice.

Oregon’s land use planning system has long been a model for responsible and deliberate land use planning. However, it fails to explicitly consider climate change within any of the 19 statewide land use planning goals. A single new statewide land use planning goal—Goal 20—would ensure that climate, equity and environmental justice are addressed in our statewide land use planning decisions.

I also urge the members of the House Committee on Energy and the Environment to indicate their support for the recommended budget of \$800,000 to both initiate and finish the adoption of a new Goal 20 for Equity and Climate in this biennium.

HB 2488 will guarantee climate and equity-responsive land use planning by Oregon’s local governments and ensure that Oregon is prepared for the unique challenges of this century.

Thank you for considering my comments and creating an equitable and climate-smart future for Oregon.

Sincerely,

Laura Allen
