

HB 3115 is very simple. Ask yourself this: How would you like to be treated if you found yourself homeless? This bill is about being a human being. Why should a homeless person be treated less than a human being? Do you become less of a human or more of a threat -- just because you find yourself on the street with nothing? So much of the criminalization of homelessness is based on fear, hatred, and dehumanization. All the religions in the world are based on the Golden Rule. What's good for you should be equally good for other people. No qualifiers! No ifs, ands, or buts!
