

Hi:

I am sick of listening to reasons to stall on regulating air quality in this state.

I just listened to testimony from this guy from Stoel Rives - Now I'm listening to another guy - talking about how unfair it is.

While these guys are fretting about how fair it is - communities that are disproportionately suffering from air pollution are sitting around waiting for our government to do something about it.

Our government needs to pass EFFECTIVE legislation because we don't have time for to wait - waiting is the most unfair thing of all.

To be blunt: Compromising with these rich white guys is hurting the most vulnerable people.

Thanks!

Jennifer Starkey
