

Please oppose this bill. Changing history and forcing people to view the world through race is insane. Yes, we all have different perspectives, but that is because we are individuals, not just because we come from a particular race. This will destroy the education system and I know many who will opt out completely from public school. Don't damage our children. Every race is unique and every person is unique. Let's not destroy our country and our children with this horrible bill. Teaching about culture and history is important, but putting a racial spin on everything and everyone is nonsense. I know so many kids who identify as two or more races, these ideas will hurt them and all kids.
