

This Bill allows for un-matured minds to cast votes in elections that have major ramifications for years. It allows these individuals who have little to no real world experiences to potentially make decisions based on gut reactions and without thought. An average 16 year old does not have the mental fortitude to comprehend impacts their decisions have. If we give 16 year old's the right to vote, we need to give them the right to join the military, buy tobacco and be held accountable for their actions in adult courtrooms. Vote no on this ridiculous idea.
