

Sometimes I am afraid to go to school. The last few years, I have become more and more aware of my safety at school. Being a student is my life, from age 5 to 25. No one should have to be scared for 20 years, especially when the main focus of my life should be increasing my knowledge, making friends, and learning skills for the real world. HB 2510 should be passed so that we can protect students and the general population. 199 teens in the U.S have been killed from firearms in 2021, which is absolutely astonishing. By keeping firearms locked up in a safe we can protect and prevent innocent lives from being taken. Thank you for your time.
