

We can prevent future mass shootings by passing this bill. We have seen in the past that shootings can be prevented in this way. In my opinion, the best part about this bill is that it does not violate the second amendment! It should be in everyone's interest to pass this bill. If you are not a fan of guns, this bill makes guns safer. If you are intent on keeping your guns, this bill allows you to do that, while making it safer to do so. And if we can decrease the number of mass shootings without banning guns, that satisfies everyone's goals! This bill seems to me like a really good compromise.
