

This is completely ridiculous.. the fact that you could even consider limiting what boats can go out on the public waterways is a joke. I get that the city of Portland is already going to shit but you cannot pass something like this to make living in this part of the state that much worse. You're affecting people's livelihoods but more importantly restricting people's freedoms. If you want to be communists then great go ahead and pass this but this should be illegal and you're all idiots
