

The Willamette river has been used by my family for years with a boat that weighs 5000 pounds. It is a standard 21 foot ski boat. If this law is passed, I will own a boat that my family will not be able to enjoy on a regular basis as we would have to travel to other bodies of water to waterski, wakeboard, surf and tube. I have enjoyed many great times on the river doing these activities with my family. It would also shut down many businesses with the workers left unemployed.
