

HB-2510.

Public testimony .

I Oppose HB-2510 on the grounds that it is not the governments job to dictate what we do in our homes and how we store our guns. I believe that each home or setting will have different needs in this manner.

Please focus on the Mental Health Crisis we have in this country and the violent crimes and suicides will go down.

Micromanaging law abiding citizens will not effect your stated concerns of this bill.
