

Representatives,

Please carefully consider your position on this bill. It is advanced by a few and restricts the use of a public waterway from the many. The actual wake a boat puts off is what we should regulate if there are concerns. The weight of a boat is arbitrary and the wake it produces is a results of the decisions of the human driver. Let's use more enforcement of existing laws to regulate the outcomes of the human drivers' decisions and not outright ban's on a class of boats that are innocent.
