

The 4000 pound weight limit, it's too light for today's modern boats, it would limit my family to use other areas, and we live super close to this area. My wake boat was \$40,000. We saved for five years to be able to buy this boat and use it in our area. But it still exceeds your maximum weight limit of 4000 pounds so I would be forced to sell it and not use it on the river..
