

Statement of Napoleon Hodgers in support of SB 700

As a brain injury survivor, I would like to express my support of SB 700. In addition to my own history of brain injury and head trauma, I have worked with many individuals through my non-profit organization who have experienced and survived one or more brain injuries. This is an important piece of legislation that I wholeheartedly support and consider important enough to put my support of SB 700 in writing and on the record. Thank you.
