

Please do not pass this bill. When in history has it been good for a government to regulate choices of education for children? I do not understand how this bill is constitutional. We have made the choice to send our children to a Private School because we do not agree with the standards of public school. We should always have the right to have our children be educated in a way that aligns with our beliefs. You may not agree with everything that I believe but this is exactly what our Country was built on. The ability to believe differently and work together to make this world a better place. Silencing those that think differently will only widen the gap. It will be a very sad day in our history if this Bill is passed.
