

The Senate Committee on Education, attn: Chair Senator Michael Dembrow, Vice-Chair Senator Chuck Thomsen and Members of the Committee:

I support SB 404-2. I am a citizen of Multnomah County. I do not have an agriculture related business, but am an avid organic gardener and eater.

Organic businesses can help our earth by providing environments for important pollinators and other beneficial organisms. Some can even go further and farm regeneratively to sequester carbon in the soil, helping to fight climate change.

Thank you for your consideration on this bill.

Rebecca Clark
