

I do not support this bill. I pay for private school for my child. I pick the private school and the theme of the school to pay for. My taxes still go to my local school while I pay for something different. I make this decision based on what I want for my child. With paying those taxes it allows my child to participate in the local school activities. These are decisions that I make for my child and am willing to sacrifice for. The state should not be able to come in and mandate anything within our school and what it teaches nor should my child be penalized and not be able to participate in local activities at the local school I pay taxes for. Keep public school public and private school private.
