

Hello Representatives,

I chose to become an esthetician because these are lucrative careers that truly help people feel and look amazing. With everything going on in the world right now and being out of control, these services we offer can truly help the public feel happier and healthier.

I am about to be a licensed Esthetician and I'm excited to start my career. Microdermabrasion and LED light therapy are two of the practices I am most excited to perform. I believe they both belong in our scope of practice and do not need more training or licensing to complete safely and effectively. It would really impact my practice and not allow me to fully help my clients achieve younger, beautiful skin without these services.

I really insist these services stay in the esthetician scope of practice. We have spent time and money learning these services to be able to perform them safely and effectively and it would be detrimental to take that away!

Thank you,

Claire McElroy
