

Qualified immunity protects rogue public safety officers, and it allows municipalities to dodge their responsibility to enforce professionalism. It leads to the disproportionate deaths of persons with disabilities, persons with mental health challenges, and people of color. Too many innocent people have been killed because of individual malice or institutional failures. Individuals and municipalities must be held accountable for their actions if we are to have a just and safe society. Anything less is a moral failing for our society as a whole. Please end qualified immunity in Oregon.
