

Hello,

My name is Rachel Bosworth and I support this bill and would like to see it moved forward.

I'm a farmer in Molalla on 22 acres and have witnessed first hand the devastation of climate change in real time. My family was one of the first to be evacuated from the Wilhoit fires this summer and I wish I could describe to you the terror of being evacuated in the middle of the night and seeing flames running up my back pasture. There is no more time to waste on climate change and this bill would provide real solutions for farmers like myself and those in my area. The devastation from the wildfires and ice storm has made it abundantly clear that we need to prioritize carbon sequestration and soil building and this bill would allow farmers to move from traditional farming to more regenerative methods that can help heal the earth. Right now it's difficult for farmers to transition from traditional to regenerative. This bill could change that. The demand is there. Please pass it.

Thank you for your time.

Rachel Bosworth
