

Page 1, Line 6, "...the amount of 1,400,000..." divided by 36 counties is \$38,889 per unit and installation. Online price for Drake Digital Emergency Alert Encoder (SDE24EAS) Your Price: \$1,169.99 (Listing Price: \$1,499.00) x 36 counties = \$42,120. Appropriation is \$1,400,000 – \$42,120 = 1,357,880 or \$37,719 per county for installation. Where is Oregon buying their electronic equipment or hiring your electronic technicians because I definitely want to invest in that company? Oregon buying titanium or gold or platinum units just don't see that the cost of each unit installed would cost almost 39 grand for each county. Someone is pulling the wool too tight or lose, it's just crazy expensive proposal. I definitely oppose SB 363 again.
