

I send my children to private schools because we want them to go to school with like minded people. We have been in public schools and our oldest is still in one. Private school is so much better than public. Don't ruin that. Children are well protected with other bills. This bill is falsely stating it's protecting kids when those bills are all ready in place. This is to get ODEs fingers into private schools because they are so much better than public schools. Again, don't ruin good schools in the name of sports and safety. When those are very good left alone. We pay taxes so our kids should be able to play sports against any public school teams. Let private school kids thrive.
