

I oppose making private schools register with the ode. We pay for private school in order for our children to obtain a better education than public school provides. We have found that private school offers way more for our family, such as morals and values that public school doesn't offer.

Since we pay for private school, the state should remain out of any registry or decision making process. Private school goes above and beyond that of public. I oppose any further registry or state involvement in private school.
