

Retired River guide 29 years 1990 - 2019 best thing I have heard would love to see this program put in to practice they have been used before when we had strong runs of fish we where told by biologists they didn't make any different apparently they sure didn't hurt any thing we could use any thing that helps bring fish back in are rivers maybe next we could work on predators like seals sea Lyons certain predatory water fowl
Thanks Todd Puett
