

Opposition to Bill 360

We all know the catastrophes that have taken place due to the use of nuclear power plants. Radioactive water is flowing by the thousands of gallons into the Pacific Ocean from Fukushima. Chernobyl continues to be uninhabitable and deformed animals continue to be born there. What are we doing planning more reactor for exempting reactors from any kind of restriction? We are fighting for survival of the planet. Drastic climate action is what is needed not more risk of contamination. The planet cannot take any more treatment of this kind. No nuclear power in Oregon! Legislators, please come to your senses!
