

The business of "taking your ball home and not playing anymore" was an effective tool for loser and malcontents in grade school. to lose all their friends/

Doing this in the most important legislative body in Oregon, and repeating the behavior really does harken back to grade school. I am embarrassed for the state of Oregon that its government allows childish behavior by adults to be allowed.

I urge the bills addressing this type of behavior be brought off "the desk", put into committee, and taken to floor for vote as soon as possible
