

Please vote against SB223. This is an unconstitutional invasion of the rights of the children of the State of Oregon. Those who choose to participate in interscholastic sports will be cheated unless Private Schools choose to register with the State. Most Private Schools probably will take a stand against registering with the State because they do not want oversight by the State. What happened to recognizing "Non Public Education" being VITAL part of Oregon's educational system. Of course the Public Education System would also be hurt as those children would not have the opportunity to compete against the Private School children. Thanks for opposing this bill.
