Re: I Support [HB 2786] ...

[HB 2786] has been needed for several years if not decades.

Family-scaled meat producers create; more rural economic opportunities, additional market share, competition and is basically, the American way of supporting family-scaled farms.

There is too much travel and butchering time to have meat inspected by USDA inspectors. These "barriers" need to be eliminated to; enable and facilitate family-scaled meat production to be more affordable and easier to serve growing local markets.

Thank-you for your support of the family farmers!

Respectfully submitted,

/s/ David S. Wall
