

As an RN I oppose HB 2591.

Nursing /medical students while still in school need to be trained to provide FULL transparency to their patients and thier family members (if underage). As an RN one problem that I see that some would not is that this program is training nursing/medical students to circumvent parental rights.

Then as a parent who controls my kids healthcare along w/ our pediatrician I dont want anybody else involved!

Also because Oregon school system is one of the worst in the nation (thanks to a Democrat controlled state) it should NOT be focusing on this overreach & focus on READING, WRITING, & ARITHMETIC.

Who will the government choose to run these mobile units? Probably a special interest group that has donated to the Democratic party. A special interest group that also wants to pass out hormones & abortions to our children.
