

To the House Committee on Judiciary
03/23/2021

Support for this bill with the following Amendment:

Add the Industrial Hemp program from the Oregon Department of Agriculture into this program of racial accountability. I have experienced bias and discrimination within this program from both state agencies and private enterprises. These are legally two separate programs and therefore actors in the Hemp program are following different policy agendas as those in OLCC. This has spilled over into the Small Business Administration certification of minority businesses in the industrial hemp program.
