

3/23/20213:15 PMHouse Bill 2263House Committee on General Government
Directs Oregon Liquor Control Commission to study recreational marijuana tracking.

I oppose House Bill 2263, the legislative assembly just keeps squeezing the little guy in bureaucratic rules, fees, and time wasters for the industry. Possibly the legislative assembly doesn't appreciate the little guy enough, but you only have to look at the tax revenue legalizing marijuana has done for revenue in this state. I'm not saying that there are not wealthy players in the marijuana and cannabis or cannabinoid industry, but I'm sure a lot of the retail and businesses in the retail marijuana, growers, processors and extractors in the industry are not fortune 500 companies. Stop legislating and taxing, before marijuana was legal in Oregon where did you believe the products came from, definitely was not from a licensed grower. The legislative assembly is driving the marijuana market into a free market with no boundaries on regulation just as it was for years. Quit wasting the tax revenue on these ridiculous Bills that will only give the state the illusion of being in control of its citizens over marijuana use.
