

All you need to know about this bill:

The same esteemed senator sponsoring this bill is also behind a raft of frivolous gun control bills that only punish law abiding citizens. One his bills this session would impose a 5 year sentence for merely possessing an unfinished gun part. Not a gun, a gun part. Seriously- you can't make that level of absurdity up; 5 years in jail for a hunk of plastic or aluminum that he can't prove has ever been used in a crime in this state, but sure- let's release felons early...never mind the 57% recidivism rate for released felons in Oregon. Stop the insanity and abide by the will of Oregon voters.
