

As a citizen of Portland, and an educator in PPS that works with the community at the newly renamed McDaniel High School that is located on 82nd, it is vital that our state does what is necessary for our students and community to make the neglected stare Highway into a road way that is safe and accessible for our citizens. There is no need for more people to die because of this faulty designed road way— we have the capability to transform this Highway. Please do what is necessary so we may invest in the repair and improvements that this roadway so desperately needs.
