

Hello,

My name is Tony Egli and I'm 61 years old. I had the same primary care physician for 30 years and he recently retired. At retirement he suggested another internal medicine Dr because of my health history. I have been with this "new" PCP for about 4 years and haven't been very satisfied. Nearly 2 years ago I was referred to an ND who at the time was working out of Kwan Yin Healing Arts Center. My experience with this young, vibrant, intelligent doctor was nothing short of amazing! She not only had natural remedies for some of my ailments but she was also an acupuncturist who was able to give me miraculous results in just the first few appointments. This doctor of natural medicine helped to change my life in a much more positive way than any doctor or specialist has in my entire 61 years! I will NEVER stop seeing her.

Sincerely,  
Tony Egli
