

PLEASE put a stop to mega-dairies in Oregon!!!

- 1) Mega-dairies are cruel and inhumane. The cows are more likely to be intensively confined without access to pasture, separated from their offspring immediately after birth, subjected to extreme production demands, and killed for meat at an early age.
2. Mega-dairies pollute the air with greenhouse gases and other emissions, pollute nearby waterways and groundwater aquifers with runoff from animal waste, use enormous amounts of water, and drive family farms (which are more likely to treat the animals better) out of business.

Oregon is better than this. PLEASE don't look the other way!!!
