

As an Oregonian and an avid fly-fisherman, I understand the idea of sport. I understand the value of being outdoors, being with friends and family, bonding in an activity with a rich tradition, and what that means to a sense of self and place. But as a sportsman, I cannot see anything sporting in the senseless, unethical, and inhumane killing of these animals. This is not sport. This is not who we are. This is not who we should strive to be as Oregonians. I urge you to consider supporting HB 2728. This isn't a urban Vs rural issue, this is an issue of what is right and what is wrong.
