

I am in favor of shutting down the cruel and dangerous mink industry. It is cruel because these animals are packed into small wire cages then killed for their fur. No one needs to wear fur coats and also inflict suffering on these poor animals. It is dangerous because minks are susceptible to Covid-19, which can transmit to humans. The crowding and proximity to humans encourage the transmissions of "Infectious zoonotic disease." If we left wildlife alone we'd be all better off and more humane.
