

The OMB's actions are absolutely reprehensible against one of the finest medical doctors in Oregon, Dr. Paul Thomas. The current OMB needs to be reprimanded and removed from service immediately. They have endangered lives via their "emergency" action against Dr. Thomas and they have crippled hundreds of patients who depend on Dr. Thomas's care. After months of fact gathering and hearing Dr. Thomas's testimony they have still not reinstated this fine doctors license and given no response for their actions. All while Oregonians need doctors, especially during this time of "emergency".

Immediate action should be swift and just for these unimaginable crimes against citizens of Oregon.

We need citizens on the OMB who ethical, care about people, quality of care and can make intelligent decisions.

Please do the right thing, reprimand and remove the current OMB members immediately.
