

The Honorable Senator Fred Girod
900 Court St. NE, S-401
Salem, OR 97301

Senator Girod:

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. I cannot believe that legislators would ever consider a bill that directs the government to take private property, and then they offer no compensation for the farm families who will lose their livelihoods under SB 832. Mink farms are multigenerational operations with a long history in Oregon. Local farm families would have to give up everything, and kill and bury their animals immediately. To add insult to injury, SB 832 suggests that these families could apply for loans (after losing everything) or retrain for a new profession. It's offensive that the Committee would even consider this bill.

There is no scientific reason to shut down local mink farms. Zoonotic disease transmission is not uncommon, which is why Oregon's farmers and ranchers take biosecurity so seriously. The one mink farm with positive COVID-19 cases in November 2020, went into quarantine immediately and worked with the State Veterinarian and federal and state agencies to contain the virus. The farm is now clear of the virus, and we should consider this a success as opposed to misrepresenting this incident as a statewide threat.

Not only is the premise of this bill false, but Oregon's mink farms actually are part of a larger cycle of sustainability. Mink consume food waste that would otherwise go to the dump. Their manure is used as a fertilizer for other sectors of agriculture. It's a full cycle.

It is upsetting to see special interest groups attempt to shut down family farms, particularly after such a devastating year, and to play on people's fear about COVID-19. I worry that this is the beginning of a new approach to close down other sectors of animal agriculture.

I urge you today to oppose this unfair legislation, which ultimately eliminates the livelihoods of Oregon farmers and without any compensation for the families or farmworkers who will be out of work.

Please vote NO on SB 832. Thank you for considering my comments.

Sincerely,

Dylan Wells
Woodburn, OR

The Honorable Senator Dallas Heard
900 Court St. NE, S-315
Salem, OR 97301

Senator Heard:

As a livestock producer, I urge you to oppose SB 832. This bill is horrible. I cannot believe that legislators would ever consider a bill that directs the government to take private property, and then they offer no compensation for the agriculture operation and families who will lose their livelihoods under SB 832. Mink farms are multigenerational operations with a long history in Oregon. Local farm families would have to give up everything, and kill and bury their animals immediately. To add insult to injury, SB 832 suggests that these families could apply for loans (after losing everything) or retrain for a new profession. It's offensive that the Committee would even consider this bill.

There is no scientific reason to shut down local mink farms. Zoonotic disease transmission is not uncommon, which is why Oregon's farmers and ranchers take biosecurity so seriously. The Honorable Senator Dennis Linthicum
900 Court St. NE, S-305
Salem, OR 97301

Senator Linthicum:

I am a third generation farmer and our sons are the fourth generation farmers in Oregon. SB 832 is the first step in stopping animal agriculture in Oregon. We believe in the freedom of people to choose what to eat and wear. If there is a market for the ag commodity produced the Oregon Legislature should not be making laws to pit one industry against another or favor one industry over another.

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. 900 Court St. NE, S-401
Salem, OR 97301

Senator Girod:

I work full time as a farmer and am asking you to vote no on SB 832. This is a horrible piece of legislation. I find it unbelievable that our representatives would even consider a bill that calls for the confiscation of private property without compensation for those that would lose it and their livelihoods. Many of these farms have been in the same Oregon family for generations. Not only would SB 832 destroy their way of life, but in addition they would be forced to eliminate and bury their animals immediately.

It is upsetting to see special interest groups attempt to shut down family farms, particularly after such a devastating year, and to play on people's fear about COVID-19.

I urge you today to oppose this unfair legislation, which ultimately eliminates the livelihoods of Oregon farmers and without any compensation for the families or farmworkers who will be out of work. I thank you for your consideration.

If this bill becomes law, sheep & cattle can't be far behind. Using the pandemic as cover for eliminating any kind of farming is atrocious, and no compensation either is ridiculous. Please vote against this bill. Thank you

Mary & Klaus Hoehna

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. I cannot believe that legislators would ever consider a bill that directs the government to take private property, and then they offer no compensation for the farm families who will lose their livelihoods under SB 832. Mink farms are multigenerational operations with a long history in Oregon. Local farm families would have to give up everything, and kill and bury their animals immediately. To add insult to injury, SB 832 suggests that these families could apply for loans (after losing everything) or retrain for a new profession. It's offensive that the Committee would even consider this bill.

There is no scientific reason to shut down local mink farms. Zoonotic disease transmission is not uncommon, which is why Oregon's farmers and ranchers take biosecurity so seriously. The one mink farm with positive COVID-19 cases in November 2020, went into quarantine immediately and worked with the State Veterinarian and federal and state agencies to contain the virus. The farm is now clear of the virus, and we should consider this a success as opposed to misrepresenting this incident as a statewide threat.

Not only is the premise of this bill false, but Oregon's mink farms actually are part of a larger cycle of sustainability. Mink consume food waste that would otherwise go to the dump. Their manure is used as a fertilizer for other sectors of agriculture. It's a full cycle.

It is upsetting to see special interest groups attempt to shut down family farms, particularly after such a devastating year, and to play on people's fear about COVID-19. I worry that this is the beginning of a new approach to close down other sectors of animal agriculture.

I urge you today to oppose this unfair legislation, which ultimately eliminates the livelihoods of Oregon farmers and without any compensation for the families or farmworkers who will be out of work.

Please vote NO on SB 832. Thank you for considering my comments.

Sincerely,

Klaus Hoehna
Weston, OR

The Honorable Senator Brian Boquist
900 Court St. NE, S-311
Salem, OR 97301

Senator Boquist:

Really? REALLY? How absurd can you get. Mink do not spread COVID. Oppose SB 832. And by eliminating mink from the US that will solve the problem? What so we can get it from overseas? No thank you.

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. I cannot believe that legislators would ever consider a bill that directs the government to take private property, and then they offer no compensation for the farm families who will lose their livelihoods under SB 832. Rickreall, OR

The Honorable Senator Lynn Findley
900 Court St. NE, S-403
Salem, OR 97301

Senator Findley:

As a rancher, I urged you to oppose SB 832. I do not understand why you as a legislative body would take away the rights of a person who is working and making a living. Banning an industry that has benefits to the general population concerns me to what extent this bill will have on all of agriculture. I stand behind the few mink farmers we have in this state by asking you to stop this bill now. In Oregon we promote agriculture by the diverse products that are produced in this state. If you get rid of one commodity what commodity is going to be next. SB 832 does not give any compensation for the takings of this commodity. You tell the farmer they can get a loan, but as a business it's not a practical solution because with today's unstable markets changing commodities could be cost prohibited. There is no scientific reason to shut down an industry in this state. There are no common zoonotic diseases, and bio security on all farms and ranches across the state are taken very seriously. Mink farming is part of a larger cycle of sustainability. Mink consumes food wastes that would generally go to the dumps, their manure is used as a fertilizer for other sectors of agriculture, parts of the mink are also used to bait crab traps. These uses for mink make a full cycle. Taking a small portion of our population who fears COVID-19, when it has had an affect in all areas of the farming and ranching community, as well through the entire population. to shut down family farms. This approach is concerning to me that this will be used in other area of agriculture when some do not like what they raising. This bill is badly written and puts families and their employees out of business.

I am asking you to vote NO on SB 832.

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. Bonanza, OR

The Honorable Senator Fred Girod
900 Court St. NE, S-401
Salem, OR 97301

Senator Girod:

As a farmer, I urge you to oppose SB 832. It is so troubling to see special interest groups attempt to shut down family farms, particularly after such a devastating year, and to play on people's fear about COVID-19. This is one of the most disturbing, worst bills I've ever seen.

I cannot believe that legislators would ever consider a bill that directs the government to take private property, and then offer no compensation for the farm families who will lose their livelihoods under SB 832. I also worry that this is the beginning of a new tactic to shut down other sectors of animal agriculture.

It is so offensive that the Committee would even consider this bill. Mink farms are multigenerational operations with a long history in Oregon. Local farm families would have to give up everything and kill and bury their animals immediately. To add insult to injury, SB 832 suggests that these families could apply for loans (after losing everything) or retrain for a new profession.

Oregon's farmers and ranchers take biosecurity very seriously and know that Zoonotic disease transmission is not uncommon. The one mink farm with positive COVID-19 cases in November 2020, went into quarantine immediately and worked with the State Veterinarian and federal and state agencies to contain the virus. The farm is now clear of the virus, and we should consider this a success as opposed to misrepresenting this incident as a statewide threat. There is no scientific reason to shut down local mink farms.

Not only is the premise of this bill untrue, but Oregon's mink farms are in fact part of a larger, complete cycle of sustainability. Mink consume food waste and by products that would otherwise go to the landfill. Their manure is used as a fertilizer for other sectors of agriculture.

I urge you today to please oppose this unfair legislation, which ultimately eliminates the livelihoods of Oregon farmers and does not provide any compensation for the families or farmworkers who will be out of work.

Please vote NO on SB 832. Thank you for considering my comments.

Sincerely,

Dana Estensen
Silverton, OR

The Honorable Senator Chuck Riley
900 Court St. NE, S-303
Salem, OR 97301

Senator Riley:

Please Oppose SB 832. Stop the extremists from impacting farmers rights.

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. Forest Grove, OR

The Honorable Senator Fred Girod
900 Court St. NE, S-401
Salem, OR 97301

Senator Girod:

It starts with Mink Farms, and then moves to all farm businesses. The radical nature of the current legislator has no foresight to the slippery slope they are on. There has to be more common sense applied to the roll of government, and stop thinking that we need more government oversight. There are enough systems in place now to mitigate this risk as evidenced by the good judgement of the one mink farm that had an issue, and their cooperation with ODA. We have a mink farm near us, and have seen what care they take with their animals and family business. This is not okay.

As a farmer, I urge you to oppose SB 832. This bill is one of the worst bills I've ever seen. I cannot believe that legislators would ever consider a bill that directs the government to take private property, and then they offer no compensation for the farm families who will lose their livelihoods under SB 832.
